

Diagram illustrating a bus system with 10 stations. Each station has a 30-bit address and an 80-bit data bus. The total bus width is 110 bits. A central '922' is shown below the bus.

Technical drawing of a bridge deck cross-section. The drawing shows two identical bridge piers supporting a bridge deck. The total width of the bridge deck is 385 cm. The distance between the centers of the two piers is 280 cm. The width of each pier is 50 cm. The height of the piers is 100 cm. The top of the piers is 35 cm wide. The bridge deck is 20 cm wide on each side of the piers. The drawing includes dimension lines and numerical values for all dimensions.

Technical drawing of a wall cross-section. The drawing shows a central cavity with a width of 280 units. The total width of the structure, including the outer walls, is 385 units. The wall thickness on the left is 50 units, and on the right, it is 55 units. The total height of the wall is 100 units. The top of the wall is at a level of  $\pm 0.00$ . The drawing includes a scale bar at the bottom indicating 0, 10, 20, and 30 units. The wall is shown with a hatched pattern, and the cavity is empty.
